Training Course

FINANCES IN THE POST-INDUSTRIAL ECONOMY: NOONOMY in the Saint Petersburg State University of Economics

The training course *Finances in the Post-Industrial Economy: Noonomy* has been designed for highly qualified financial managers to shape their worldview and understanding of key development trends of the modern economy.

The goal of the course is for the students to acquire competencies in the field of transformation of economic financial models on macro- and micro-levels in consequence of the evolution of public relations under the impact of scientific and technological progress. The world is caught the process of rapidly changing global economic relations which requires rethinking of prevailing economic theories and concepts. A failure of the post-industrial economic paradigm as the economy of financial services and information technologies has led to generation of a theory of a new industrial society of the second generation (NIS.2). The evolution of theoretical and methodological approaches to establishment of a new post-industrial economic model as the economy based on the principle of elimination of an individual and their labor as an immediate resource of material production while preserving creative industries and intellectual activities by humans have laid the foundation for an independent scientific concept originated by S.D. Bodrunov.

The subject is offered for the third-year students of the Bachelor Program pursuing Course 38.03.02 – Management, in the field of Financial and Investment Management in the FSBEI of HE Saint Petersburg State University of Economics.

The course has been developed by E.A. Tkachenko, Doctor of Economics, Professor, Chief Developer of the academic content of the basic professional degree program on Financial and Investment Management, Saint Petersburg State University of Economics.

Course Structure:

Topic 1. Basic concepts of the social and economic transformation. Industrial economy; post-industrialism; new industrial society 2.0; post-industrial economy 2.0; noonomy.
